## 1 About us

- ❖ The Angus Middle East's offices are based in the heart of the Arabian Gulf in Abu Dhabi since 2003.
- ❖ We have already built up a well established local and international customer base and a reputation as experts in tackling all aspects of Asbestos Removal and Demolition Contracts work.
- ❖ Demolition, Asbestos Removal and Waste Disposal are the main focus of Angus in the Middle East. A wide range of new innovative ideas, together with up to date
- ❖ Health & Safety techniques ensures our work is carried out safely and professionally by trained personnel.

Asbestos Removal

Building Demolition

## Experience and Accreditations

- ❖ Our CEO is Charles Kinniburgh who is Scottish and has worked in the Asbestos Removal and Building Demolition Industry for over 25 years. He was born in Glasgow, which was once a world famous ship building capital on the river Clyde. (Unfortunately, it was also famous for the Asbestos materials also used in the ship building industry).
- ❖ Charles set-up Angus Asbestos Removal in 1987 and was responsible for many Asbestos removal and Building Demolition projects throughout the UK and became the Chairman of ARCA Scotland for five consecutive years.
- ❖ The company was carrying out large and small scale contracts throughout Europe and the Middle East in 2002, which then led to the formation of Angus Asbestos Removal and Building Demolition LLC in 2003, and also Angus Asbestos Removal in Singapore.
- ❖ Asbestos surveys are conducted by highly trained and extensively experienced BOHS P402 qualified Asbestos Surveyors, with Sample Analysis being only done by trusted UKAS accredited Laboratories.
- ❖ We are licensed Asbestos waste carrier with the license of Permit to Practice Asbestos Waste Management from TADWEER - Centre of Waste Management, Abu Dhabi.
- ❖ We are also ISO 9001:2015, ISO 14001:2015 and OHSAS 45001:2018 certified. All work carried out is in accordance with the Approved Code of Practice issued by CWM, UK and UAE's Health and Safety Guidelines and other relevant industry standards.
- ❖ Our Head Office is based in Abu Dhabi and we now have many clients throughout the Middle East and Africa. Our success has been due to a personal understanding of our client's requirements, and to ensure that health and safety is paramount for all projects with a personal involvement by our trusted team from start to finish.
- ❖ So many of our clients have come to us on recommendations from former clients, that says something!

## RANGE OF SERVICES

### Asbestos Removal

- ❖ Domestic and Industrial Asbestos Removal
- ❖ Removal of asbestos products Chrysotile, Crocidolite and Amosite
- ❖ Removal of asbestos contaminated dust (ACD)
- ❖ Asbestos surveys, testing and analysis
- ❖ Removal of asbestos pipe lagging and re-insulation
- ❖ Remediation of asbestos and other contaminants in soil
- ❖ Removal and transport of asbestos waste to licensed facility
- ❖ Final disposal of asbestos

- ❖ This is Angus Asbestos Removal main business, and we have built up a portfolio of successful relationships with clients locally and globally, over the years to help and assist in Asbestos removal and abatement projects. Asbestos removal can be a sensitive issue for employers and building owners, as there are many Health and Safety concerns regarding the safe removal and disposal of Asbestos. No exposure to the public or employees are paramount for all the projects big or small , hence Asbestos Removal works should only be carried out by a licensed contractor.
- ❖ We have a highly trained and experienced workforce to organise the Asbestos removal. We can organise it all on behalf of our clients, from the planning and preparation, to the removal and packing stages, to the transportation of the hazardous waste, for final disposal in a licensed landfill facility run by the government organisation Centre for Waste Management in the UAE.
- ❖ All work carried out by our company Angus is in accordance with the Approved Code of Practice, issued by Centre of Waste Management, UAE, UK and the local Health and Safety Guidelines
- ❖ Our clients include Government bodies, the Oil and Gas industry, historic sites, property owners and Landlords and home owners.

## Asbestos Consultancy

There is a legal requirement to have a management system for asbestos in each commercial property which has Asbestos Containing Materials, ACMs in the UK. Our expertise starts with understanding our client's requirements and therefore we can offer free advice to discuss the best solutions and outcomes for any Asbestos issues.

## Asbestos Surveys

Do you have Asbestos?

If you don't know, let us help you find out, An Asbestos Survey is good starting point.

This Survey allows for effective management of Asbestos Containing Materials, to risk assess, and to develop a strategy should further refurbishment or demolition works become necessary.

We have professional P402 Surveyor's who carry out the out surveys. They will give you advice on where Asbestos might be on your property, and will carry out a free assessment, first to establish if you have any Asbestos.

Then we will perform a walkabout initial survey and if required take samples of suspect materials which will be taken to a trusted UKAS laboratory for analysis and checking.

As per the HSE document "HSG264 Asbestos: The survey guide", we carry out two types of surveys:

### Management Surveys:

This is a standard asbestos survey with the purpose to locate, as far as reasonably practicable, the presence and extent of any suspect Asbestos Containing Materials in the building during normal occupancy.

### Demolition / Refurbishment Surveys:

This survey is required before any refurbishment or demolition work is to be carried out. It is more intrusive and this survey uses more Invasive methods in order to access areas, which would normally be classed as inaccessible within a management survey

The survey report will ideally include the following information:

- Scope, type and extent of the survey
- The locations with identified or presumed ACMs
- Areas not accessed which will be specific to the survey and not generic
- ACMs with high material assessment scores
- Survey results including tables, marked-up plans and material assessment results
- Data to prepare an Asbestos Register (if required)
- Clear notes on any actions and priorities.

## **Air Monitoring and Safe Environmental Assessments**

It is essential to carry out air testing and risk analysis before, during and after any situation in which Asbestos materials have been removed or disturbed.

Our company Angus Asbestos Removal undertakes the following to ensure safe working conditions and that the area is free from potential Asbestos exposure and hazards.

- Background monitoring in areas where asbestos materials are present.
- Witnessing smoke tests and commissioning of enclosures.
- Leak testing for assessing fibre concentrations during removals out-with the enclosure.
- Personal monitoring during asbestos activities.
- Four stage clearance testing.
- Visual inspections.
- Reassurance monitoring.

Please remember that allowing staff or the public to re-enter an area that has not been properly assessed can result in fatal exposure to asbestos fibres.

It is essential to carry out Air Testing during and after any situation in which Asbestos materials have been removed or disturbed.

We employ UKAS accredited laboratories to carry out background and clearance testing on completion of Asbestos removal works to ensure necessary air quality standards after Asbestos removal works.

## **Asbestos Land Remediation**

One of the increased problems we are encountering is the immediate remediation of asbestos in soils. The demolition of historic buildings along with inadequate waste management practices have both led to many sites being contaminated with asbestos. Typical asbestos containing materials, ACMs found within such sites include asbestos cement products, asbestos insulation debris and asbestos insulation board. We work with clients to identify the most suitable land remediation methods for their sites which may consist of excavation or mechanical screening of asbestos contaminated material. Where possible we will separate ACMs from the affected soil to reduce the volume of waste being disposed of at landfill. During the land remediation process routine background air test are completed to ensure that asbestos fibre exposure levels are not exceeded.

Our work includes:

- Identification of suitable land remediation measures.
- Segregation and safe disposal of hazardous materials.
- Careful monitoring to ensure asbestos fibre exposure level is not exceeded.
- Ensuring compliance with legislative and environmental requirements.

## **Building Demolition**

In Demolition, we provide clients with expertise on dismantling structures from small installations to large industrial, residential and high-rise projects.

Since 1982, we have been involved in all aspects of Project Management in the Demolition and Contracting Industry in the United Kingdom (UK) and United Arab Emirates (UAE).

When you hire our team, they work closely with your personnel to develop a customized demolition strategy allowing you to rest assured that projects will be executed safely and efficiently.

Demolition is the core activity of our business and our focus is to accomplish demolitions successfully with meticulous planning, state of the art equipment and an expert demolition team.

Our Work Includes:

- Concrete Demolition
- Controlled Demolition
- Full knock downs of buildings
- Excavation
- Facade Removal
- Cladding Removal
- Commercial strip outs
- Foundation Removal

All projects are fully compliant to the highest health, safety and environmental standards recognized within the UAE.

Our team has worked throughout the UAE extensively and have an excellent Safety Record.

Safety is paramount for all our Projects and we ensure that all Safety issues and Environmental compliance throughout our Contracts.

We make great efforts to minimize disruption to nearby businesses and communities, and the environment in general.

Meena Plaza Demolition

Excavation

Facade Removal

## Soft Demolition

- ❖ When we provide soft strip services, we take responsibility for removing all non-structural elements inside and outside of a building to facilitate demolition, refurbishment or re-modelling works. We deliver our strip out works both as a standalone service or part of an enabling works package. Our experienced team of enabling works specialists deliver successful soft strip projects of all values across the UAE, from small complex projects to extensive high rise properties.

*Soft Strip-Out*

*Before*

*After*

## Facade Removal

- ❖ A façade is generally the exterior side of the building, where the exterior walls are often precast concrete panels, glass, or curtain walls suspended from the concrete floor slabs in modern high rise buildings.
- ❖ We have years of experience in the demolition of all types of building façades, and are experts in the safe removal of large precast concrete panels from high-rise structures within the UK and UAE.
- ❖ With our team of talented and specialized demolition personnel and excellent waste minimization techniques, we provide valued clients with excellent service and competitive quotes.

Cladding Removal Project of 4 Towers at Meena Plaza

## Foundation Removal

- ❖ Angus has safely carrying out the Foundation Removal and backfilling related activities on the project including;
  1. Zoning
  2. Demarcating the Utilities as per the utility survey drawings and barricading it
  3. Additional trail pits to verify any other utilities.
  4. Trial pits to expose the foundation type.
  5. Record the Type of and volume of foundations
  6. Inspection approval by the consultant
  7. Breaking of the foundations and substructures
  8. Removal of the debris
  9. Back filling and general compaction
  10. Approval of the levels
  11. Site clearance
  12. Clearance Approval

*Meena Plaza Project*

*Fisherman Wharf Project*

## MEP Removal

- ❖ Angus carried out strip out of MEP services at Meena Plaza tower 1-4(All Floors). The Scope covers the following dismantling:
  - Wiring (From all Ceilings and Distribution Panels)
  - Ducting(Metal Duct with installation will be removed)
  - Removal of pipes (Black steel chilled water pipes, PPR water pipes etc., Galvanized Iron firefighting pipes.)
  - Removal of drainage UPVC pipes

## **Waste Management**

We are a fully licensed Hazardous waste transporter with the Permit to Practice from TADWEER – Centre of Waste Management, Abu Dhabi, CWM-AD.

We provide fully trained operators to remove Asbestos safely using Professional Respiratory and Personal Protective Equipment to ensure complete Safety Guidelines are met.

*Safe Removal of Asbestos (White Chrysotile) cement roof sheeting at the Abattoir, Abu Dhabi*

Asbestos materials have to be wrapped in heavy duty polythene and sealed with tape to ensure no fibre release during transportation to final disposal at the CWM licensed landfill site.

We ensure all requirements are complied with as per the Health and Safety guidelines and Code of Practice as per the UAE Federal Law.

*Asbestos waste sealed for transportation in locked containers*

*Storage facility for Asbestos at CWM Al Dhafra, Abu Dhabi*

## 2.5 Project Experience

Angus Asbestos Removal and Building Demolition LLC is one of the leading international companies in the field of Demolition, Asbestos Removal and Asbestos Survey with presence in UK, Middle East and Asia.

We have an excellent reputation, built over a considerable number of years with high quality standards. Angus Asbestos Removal and Building Demolition LLC is working with a range of public and private sector organizations as well as private homes and small businesses, creating healthy working and living environments.

Charles Kinniburgh (CEO) was Chairman of ARCA (Asbestos Removal Contractors Association) for six years.

Kolitha Pushpakumara has been with Angus since 2008 and has been involved ever since in Asbestos Survey, Removal, and Disposal. Demolition, Asbestos Survey, Asbestos Removal and Waste Disposal is the main focus of the company.

Adequate supervision will be provided by on all sites, utilizing experienced members of its staff and workforce. The Company provides:

- A complete service in Asbestos Control: Analysis, Notification to Statutory Bodies, Removal, Air Clearance Testing and Final Disposal in accordance with the Centre of Waste Management Abu Dhabi and the UK Health and Safety Executive.
- Guaranteed excellent service and attention to detail
- Experienced knowledgeable staff on site and assurance of client satisfaction at every stage of the process
- Dedicated project manager on each site
- Highly competitive costs

The Company has association with ARCA (Asbestos Removal Contractors Association), NFDC (National Federation of Demolition Contractors), ISO 9001:2015, ISO 14001:2015, OHSAS 18001-2007 certified, and licensed by the Centre of Waste Management Abu Dhabi to transport and dispose of hazardous waste.

A wide range of new innovative ideas together with up to date Health & Safety techniques ensures trained personnel carry out our work safely and professionally.

We have secured contracts with many leading organizations, and have carried out many major contracts for Contractors, Oil and Gas Companies and Government bodies.

In 2002, we completed a major Asbestos contract, stripping three Super Tankers in Dubai Dry Docks and recently carried out extensive Surveys and Asbestos Projects in the UAE for the British Embassy, TOTAL, ALSTOM, SIEMENS, ADCO, GASCO, FAPCO, TDIC and EMAL.

Some of the Demolition, Asbestos Removal and Surveys contracts carried out by Angus Asbestos Removal and Building Demolition LLC in the UAE are:

## **Appendix D - HSE Policy Statement**

Angus Asbestos Removal and Building Demolition LLC

ENVIRONMENT, HEALTH AND SAFETY POLICY

STATEMENT OF GENERAL SAFETY POLICY

Angus Asbestos Removal and Building Demolition LLC is committed to the care of the environment by striving to continually improve our methodology and prevent pollution. It is our commitment operates as far as practicably to minimize our contribution to the production of waste and wherever possible separate and recycle as well as ensuring the health, safety and welfare of all its employees and others, who may be affected by its undertakings, so far as is reasonably practicable, in accordance with the Abu Dhabi Environment, Health and Safety (AD EHS) Policy (2006) and all other applicable legislation and guidance.

To enable these statutory duties to be carried out, it is the policy of Angus Asbestos Removal and Building Demolition LLC so far as is reasonably practicable, to ensure that:-

- (i) the responsibilities for health and safety are properly assigned.
- (ii) the responsibilities for health and safety are accepted and fulfilled at all levels of the Company.
- (iii) practical steps are taken to safeguard the health, safety and welfare of all employees, visitors and others on premises or operations under our control.

STATES COMMIMENTS

It is the intention of Angus Asbestos Removal and Building Demolition LLC, so far as is reasonably practicable, to ensure that:

There is provision and maintenance of offices, depots, workshops and site establishments as healthy places in which to work and to avoid accidents in respect of its employees, its property, third parties and their property.

- The working environment of all employees is safe and without risk to health and that adequate provisions are made with regard to facilities and arrangements for their welfare at work,
- The operations will be carried out in such a way that persons not in our employment who may be affected are not exposed to risks to their health or safety,
- There are adequate arrangements for the use, handling, storage and transport of articles and substances for use at work, which are safe and without risk to health,
- With regard to any premises under Angus Asbestos Removal and Building Demolition LLC 's control or operation on which company employees are working, there is maintenance of all plant, machinery and equipment so that they are safe, not only to employees but to sub-contractors, etc. and any other persons who may be affected,
- All reasonable steps are taken to ensure adequate resources (time, money and people) are available for this policy to be implemented effectively.
- Hazards which may exist in connection with the undertaking are identified and eliminated through generic and, where necessary specific, risk assessments. Where hazards remain they will be brought to the attention of persons who may be exposed to them.
- We are committed to comply with all relevant environmental legislation and regulations as well as our accreditation in Quality Management and HSE Asbestos License.
- All persons working for or on behalf of the company are made aware of this policy and the appropriate procedures which support it through our established system of inductions, Toolbox Talks, Audits and Internal Communication Systems.
- Appropriate personal protective equipment is provided where necessary without cost to employees.
- Such information, instruction, training and supervision is provided to ensure competencies of all employees to enable them to carry out their duties with due regard to health and safety.
- Adequate first-aid facilities are provided and competent persons are available to assist the Company in health and safety matters as required under the Management of Health and Safety at Work Regulations 2011.

The Policy and Manual defines the levels of individual responsibility and arrangements throughout the company. Eventual responsibility for fulfilling the defined responsibilities and arrangements is vested in the undersigned, whose address is: PO Box 32811, Abu Dhabi, UAE.

Angus Asbestos Removal and Building Demolition LLC

## **Appendix E - Quality Policy Statement**

# ANGUS ASBESTOS REMOVAL AND BUILDING DEMOLITION L.L.C

## QUALITY POLICY

It is the policy of Angus Asbestos Removal and Building Demolition L.L.C. to provide a range of services, which meet the requirements of its customers and quality standard parameters, and that programmes are maintained on schedule at the agreed price. All work is carried out in a cost effective and timely manner, and in accordance with the highest professional standards, and compliance with all relevant regulatory and statutory requirements, aiming for continual improvement and customer satisfaction through the involvement and participation of all levels of management, staff and other interested parties.

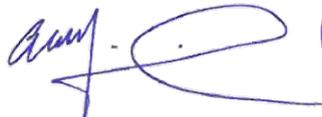

A policy for quality conforming to the requirements of ISO 9001:2015 has been established to ensure that it:

- Is appropriate to Angus Asbestos Removal and Building Demolition L.L.C.'s activities of Asbestos removal, Asbestos Survey and demolition, the expected level of customer satisfaction and the needs of other interested parties
- Includes a commitment to meeting requirements and to continual improvement
- Has the resources needed and the contribution of suppliers and partners
- Provides a framework for establishing and reviewing quality objectives
- Demonstrates top management commitment and ensures the quality objectives are communicated, understood and implemented at appropriate levels of the organization
- Is regularly reviewed at the management review meeting for suitability and effectiveness addressing continual improvement and client satisfaction.

Being a medium sized organisation, but highly efficient and quality cost conscious organisation, a number of personnel have a dual role to carry out within its many aspects and functions. It is, however, the organization's policy that this dual role shall not deter, in any manner, personnel from their prime objective of providing a quality service, through an adequately controlled quality management system. The initial function of all management and employees shall be the maintenance of this objective.

Management is ultimately responsible for making balanced judgements, assessing the significance of variations in this sphere and taking decisions. In arriving at such decisions, the quality and personal integrity of staff are of fundamental importance. In this context, all effort is made to ensure that each person in the organisation understands that quality assurance is important to their future, know how they can assist in the achievement of adequate quality and are stimulated and encouraged to do so.

This policy is approved by the undersigned and is supported by all the levels of management within the organisation. All personnel shall be guided by the contents of the quality management system and no deviation from the methods and procedures set down shall be permitted.

Signed – C. Kinniburgh

(Managing Director)

## **Appendix F – COVID 19 Policy**

# Coronavirus (COVID-19) ANGUS Policy

In this **Coronavirus (COVID-19) company policy** sample, you'll find all the essential guidelines employees should follow during the coronavirus outbreak and temporary alterations of existing sick leave and work from home policies.

## Policy brief & purpose

This company policy includes the measures we are actively taking to mitigate the spread of coronavirus. You are kindly requested to follow all these rules diligently, to sustain a healthy and safe workplace in this unique environment. It's important that we all respond responsibly and transparently to these health precautions, we assure you that we will always treat your private health and personal data with high confidentiality and sensitivity.

This coronavirus (COVID-19) company policy is susceptible to changes with the introduction of additional governmental guidelines. If so, we will update you as soon as possible by email.

## Scope

This coronavirus policy applies to all of our employees who physically work in our office(s). We strongly recommend to our remote working personnel to read through this action plan as well, to ensure we collectively and uniformly respond to this challenge.

## Policy elements

Here, we outline the required actions employees should take to protect themselves and their co-workers from a potential coronavirus infection.

### Sick leave arrangements:

- If you have cold symptoms, such as cough/sneezing/fever, or feel poorly, request sick leave or work from home.
- If you have a positive COVID-19 diagnosis, you can return to the office *only after* you've fully recovered, with a doctor's note confirming your recovery.

## Work from home requests:

- If you are feeling ill, but you are able to work, you can request to work from home.
- If you have recently returned from areas with a high number of COVID-19 cases, we'll ask you to work from home for 14 calendar days, and return to the office only if you are fully asymptomatic. You will also be asked not to come into physical contact with any colleagues during this time.
- If you've been in close contact with someone infected by COVID-19, with high chances of being infected yourself, request work from home. You will also be asked not to come into physical contact with any colleagues during this time.
- If you're a parent and you have to stay at home with your children, request work from home. Follow up with your manager or departmental leader to make arrangements and set expectations.
- If you need to provide care to a family member infected by COVID-19, request work from home. You'll only be permitted to return to the office 14 calendar days after your family member has fully recovered, provided that you're asymptomatic or you have a doctor's note confirming you don't have the virus. You will also be asked not to come into physical contact with any colleagues during this time.

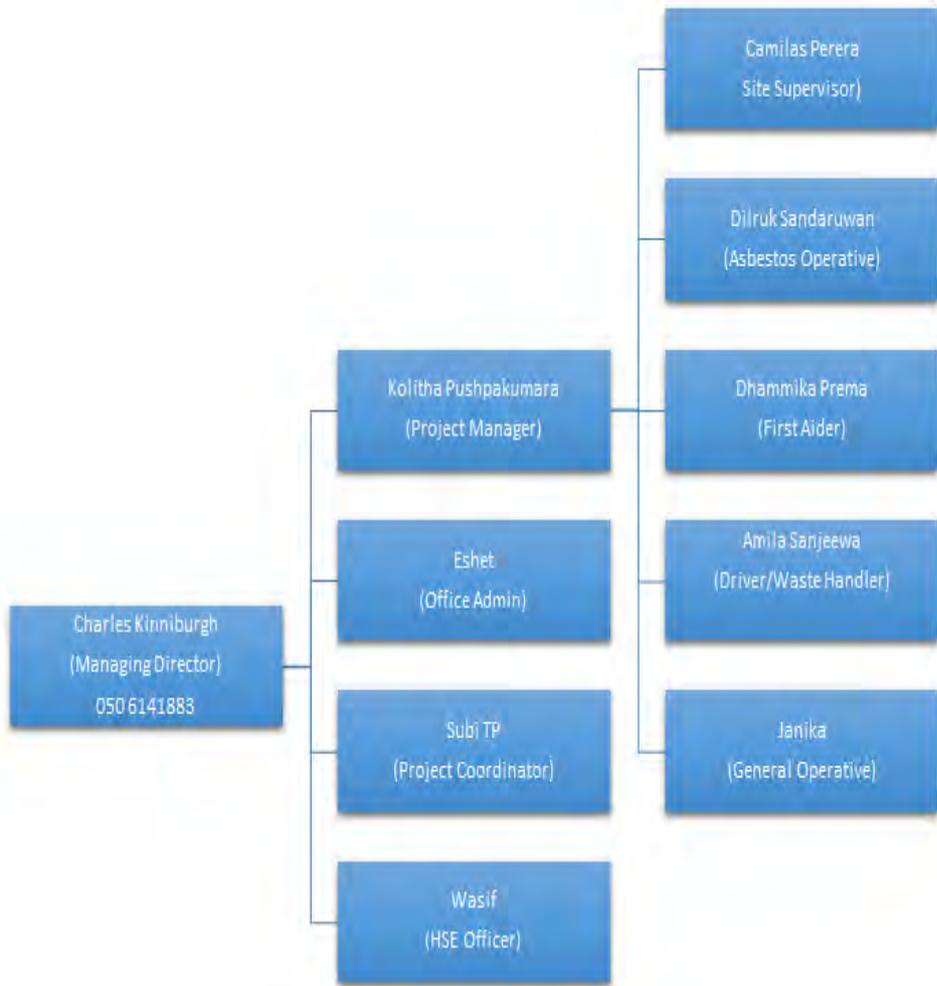

## Travelling/commuting measures:

- All work trips and events – both domestic and international – will be cancelled/postponed until further notice.
- In-person meetings should be done virtually where possible, especially with non-company parties (e.g. candidate interviews and partners).
- If you normally commute to the office by public transportation and do not have other alternatives, you can request to work from home as a precaution.
- If you are planning to travel voluntarily to a high-risk country with increased COVID-19 cases, we'll ask you to work from home for 14 calendar days. You will also be asked not to come into physical contact with any colleagues during this time.

## General hygiene rules:

- Wash your hands after using the toilet, before eating, and if you cough/sneeze into your hands (follow the [20-second hand-washing rule](#)). You can also use the sanitizers you'll find around the office.
- Cough/sneeze into your sleeve, preferably into your elbow. If you use a tissue, discard it properly and clean/sanitize your hands immediately.
- Open the windows regularly to ensure open ventilation.
- Avoid touching your face, particularly eyes, nose, and mouth with your hands to prevent from getting infected.
- If you find yourself coughing/sneezing on a regular basis, avoid close physical contact with your coworkers and take extra precautionary measures (such as requesting sick leave).

## **Appendix I – Key Personnel CV's**

# Charles A Kinniburgh

Position CEO, Angus Asbestos Removal and Building Demolition LLC

Career Summary During the last twenty five years I have been involved in all aspects of project management within the Asbestos Removal and Demolition Contracting Industry in the United Kingdom (UK) and United Arab Emirates (UAE). I have been the CEO of our Company, Angus Asbestos Removal and Building Demolition LLC for the past 25 years.

For five years, I was elected Scottish Regional Chairman of Asbestos Removal Contractors Association (ARCA) and carried out vetting of members and training within the industry.

I have undertaken the P402 course in Asbestos Surveying and Asbestos Removal procedures in accordance with all current legislation for Asbestos Removal, approved Codes of Practise, HSE guidelines and publications in the UK throughout the worldwide operations of the Angus Group.

This has resulted in successfully offering clients a fully comprehensive survey of premises which includes the main elements required i.e. survey preparation, plan of works, procedures, assessments and recording of materials, bulk sampling frequencies and analysis, with the survey report fully documented for use. Incorporating Asbestos UK Legislations and Guidelines has provided the necessary standards throughout our Asbestos Removal Operations to ensure a Safe Working Environment.

I established a new Middle East Company and Office in Abu Dhabi and have carried out Asbestos Awareness consultations with the British Embassy for working with Asbestos in the UAE as well as with a number of Oil Companies namely ADNOC, ADCO, Takreer and some Abu Dhabi Ministries, onshore and offshore activities.

We have also worked in Ethiopia, Djibouti and Uganda and we are expanding our business in Africa at present. Our company has registered offices in Singapore and have worked with Keppel shipyard on FPSO super tanker conversions.

My first experience in the UAE includes the project management for the company in the survey and associated Asbestos Removal works involved in three super tankers in Dubai Dry Dock to a successful conclusion for a total amount of 1.3 million US Dollars.

We have carried out extensive contract work offshore for Total and ADOC as well as working with GASCO at Habshan and Asab Plants. I also surveyed and project-managed the safe Asbestos Removal in all premises and buildings for the British Embassy in Abu Dhabi, Dubai, Al Ain and Tehran.

We have carried out the Asbestos Removal Works for the British Embassy in all locations in the UAE.

Professional Qualifications

- P402 Asbestos Building Surveying and Bulk Sampling
- Scottish Chairman of the Asbestos Removal Contractors Association for Five Years (1999-2004)
- Asbestos Supervisor Licence Holder Training Certificate Competent Person in Asbestos
- CA Accountant

- HNC Business Studies
- SNC Business Studies

Responsibilities

Responsible for Supervision of all aspects of Asbestos Removal in Angus Asbestos Removal and Building Demolition LLC implementing:

- Training Personnel
- Health & Safety Information and Safety Awareness
- Contractual – all Asbestos Procedures are followed
- Method Statements and Risk Assessments
- Transportation of Asbestos Waste
- Disposal of Asbestos Waste

## Position

### Project Manager

## Experience

I have been working for Angus Asbestos Removal and Building Demolition LLC since 2008 and in that time have gained considerable experience in Asbestos Removal and Demolition.

I have regularly updated my skills by attending training courses every year to maintain my knowledge of Safety Asbestos Awareness, which includes Construction of Enclosures, Asbestos Awareness, Decontamination units, Negative pressure units and Asbestos Removal Techniques.

I have been involved with many contracts as Site Supervisor. A few of the contracts have included the British Embassy, Total ABK, Hyundai, Aldar, Mafrak Hospital, EMAL, and UAE Ministries such as the Department of Antiquities and Museums, Department of Cultural and Tourism, etc.

Angus Asbestos Removal and Building Demolition LLC has also carried out extensive contract work offshore for Total, ADMA-OPCO, Fujairah Asia Power Company, Meraas Construction, and further afield for Cable and Wireless in the Seychelles. I have been involved as Site Supervisor in all of these projects and with a team of 3 – 5 Asbestos Operatives

With my technical on-site knowledge throughout the Asbestos Industry I am able to achieve and offer Site-Supervisory skills to companies and industries within the Middle East.

## Responsibilities

- Oversee day to day site operations during Asbestos Removal Works
- Implement site policies and procedures.
- Conduct regular inspections and maintenance of plant and equipment.
- Handle emergencies appropriately according to established procedures
- Supervise and evaluate staff; provide positive direction to motivate quality performance; discipline personnel when necessary and appropriate
- Interview candidate and train new hires
- Ensure compliance with company or government regulations

## Project Experience

**Title:** Asbestos Removal Works in Ras Al Hamra, Oman

**Client:** Al Tasnim Enterprises

**Location:** Muscat, Oman

**Year:** 2018-19

Safely removed and disposed of Asbestos containing materials from 163 houses.
